EXPERIENCE

Infosys

Oct 2021 – Present

Digital Specialist Engineer, Full stack Development

Hyderabad, India

- Engineered and maintained Unified ETA, a distributed systems application for Toyota Motor North America, tracking every vehicle's journey from factory to dealer; ensuring accurate updates and estimated arrival dates, resulting in streamlined logistics and improved customer satisfaction.
- During the development of this application, I leveraged a variety of technologies and services. I coded in TypeScript and Node.js, used PostgreSQL as the database, and implemented CI/CD for continuous delivery using Jenkins, JFrog Artifactory and XL Release. I also utilized AWS services such as Lambda, SQS, terraform, and kafka.js to enhance the functionality and performance of the application.

Arum Innovations Pvt. Ltd

Feb 2021 – Sep 2021

Full Stack Developer, Internship

Kakinada, India

- developed and implemented an innovative solution for streamlining internship certificate management. I created an admin panel and web application with features such as:
 - Automated verification, real-time tracking, and secure document storage of internship certificates.
 - Secure access and editing of employee records and certificate templates, each with a unique certificate number.
- Easy verification of the certificates on the company website by entering the certificate number. This solution resulted in a 40% reduction in administrative workload and improved certificate accuracy. It also benefited the employer, the interns, and the future employers in the following ways:
 - It cut down on time and costs for both the employer and the interns by lowering 60% of effort needed to generate one internship certificate.
 - It ensured security and authenticity of the internship certificates, minimizing the possibility of fraud and misuse.
 - It boosted satisfaction and trust of the interns and future employers, who could easily verify the validity of the certificates on the company website.
 - It enhanced reputation and brand image of the company, as a provider of quality internship programs and innovative solutions.
- I utilized various web technologies and services, including HTML, CSS, JS, Bootstrap, PHP, phpMyAdmin, MySQL, and Docker, to develop and deliver these applications.

Arum Innovations Pvt. Ltd

Apr 2020 – Jun 2020

Web Developer Intern

Kakinada, India

- Worked in the design and development of a web application that provides the functionality of generating and validating internship certificate.
